

IITB in the fast lane!

August 23rd and 24th saw hordes of freshmen descending on the SAC for their first tech event of the semester – F1 racing. As many as 84 teams – with names as varied as *Speedo Drifters*, *Viperz*, *Freshari* and *Torque* – had preregistered for the event, and nearly as many turned up to participate, cheered on by enthusiastic hostelmates.

Most freshies felt that the F1 racing event was an ideal introduction to the world of tech, and felt a sense of achievement at having, in their own words, actually ‘built something that works’.
