

What kind of internship did you do?

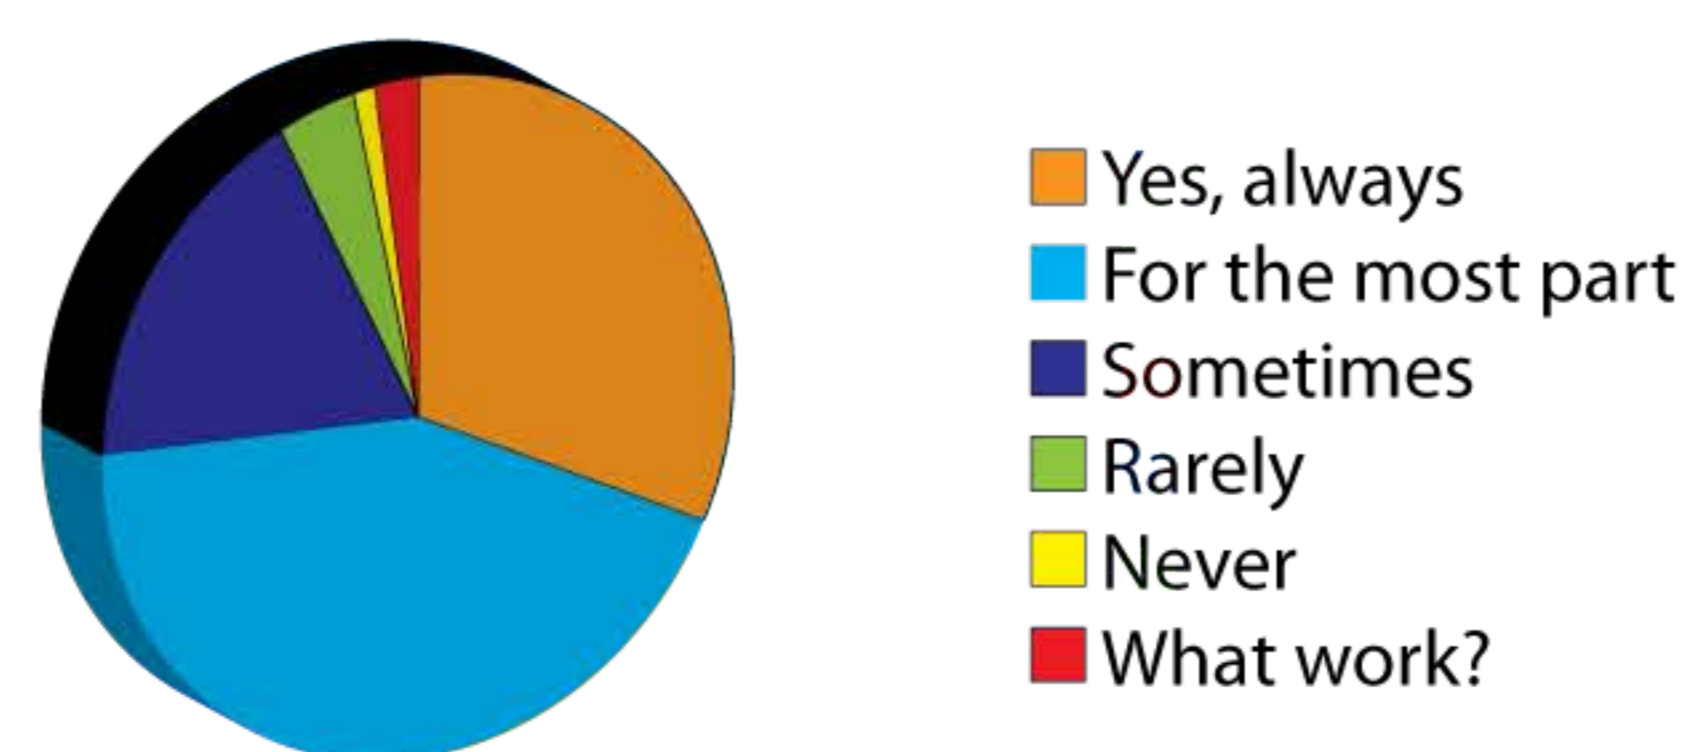

Where was your internship based?

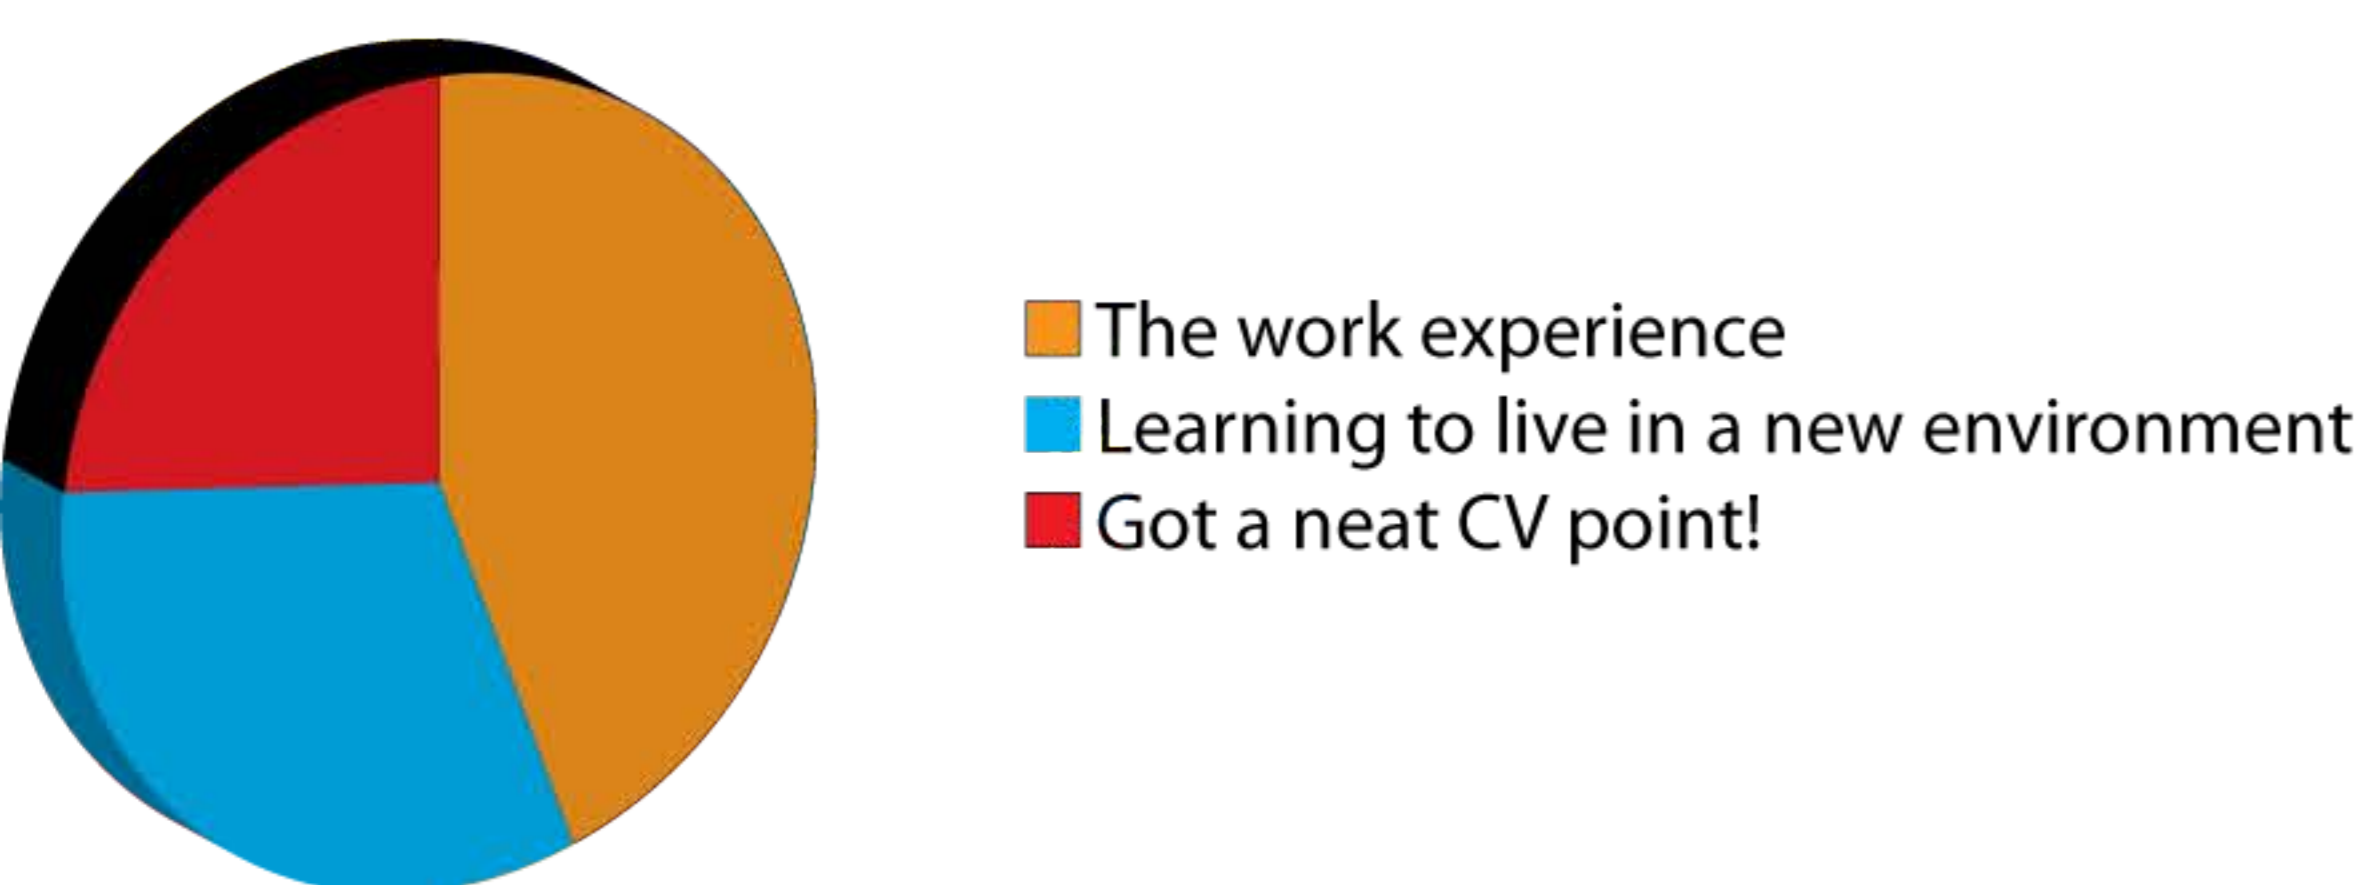

How has your internship changed your attitude towards the area in which you worked?

Did you enjoy the work you did?

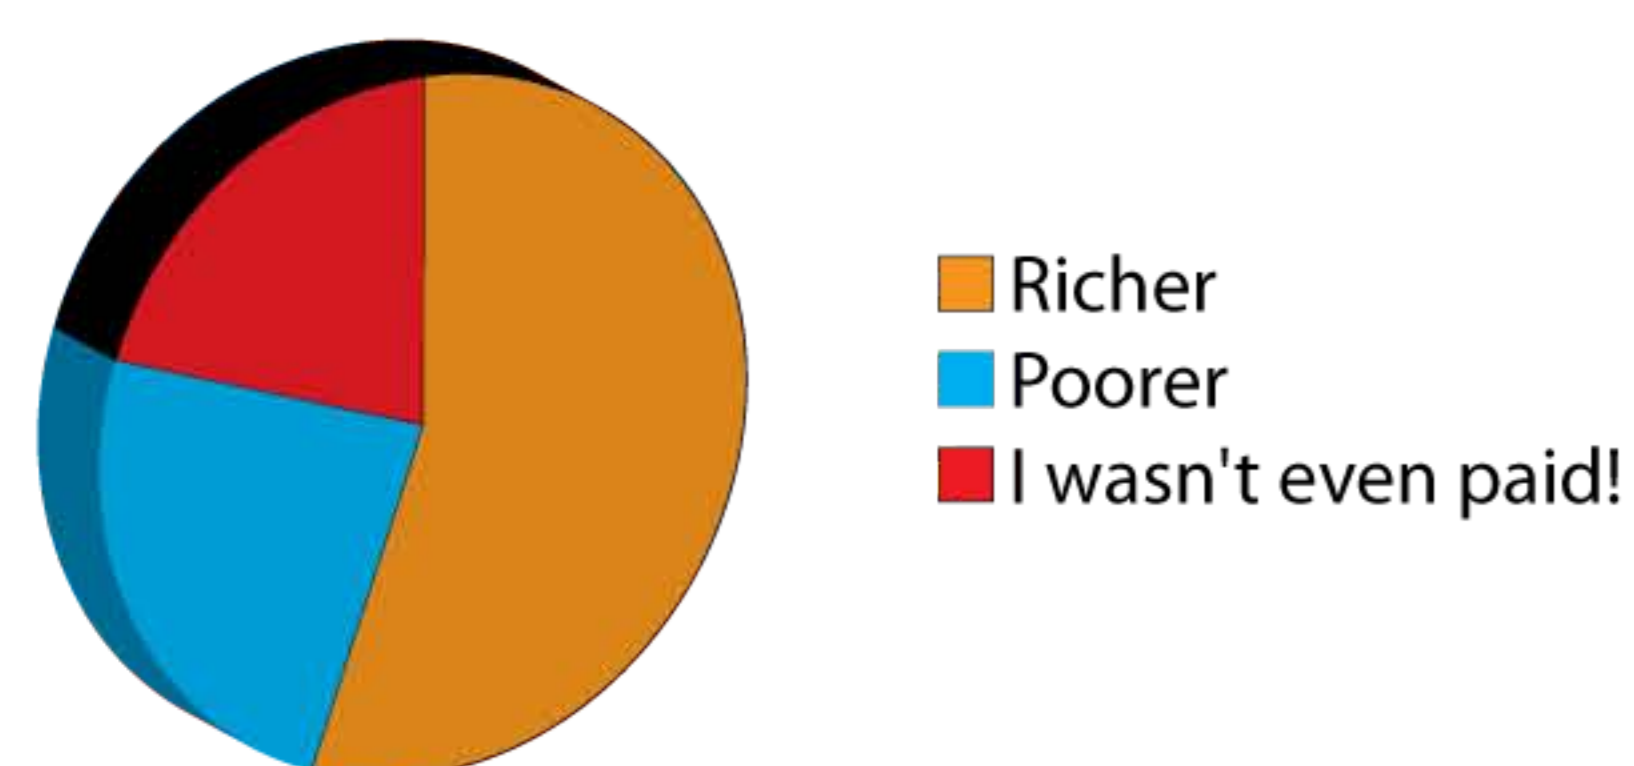

How would you say you benefited the most from your internship?

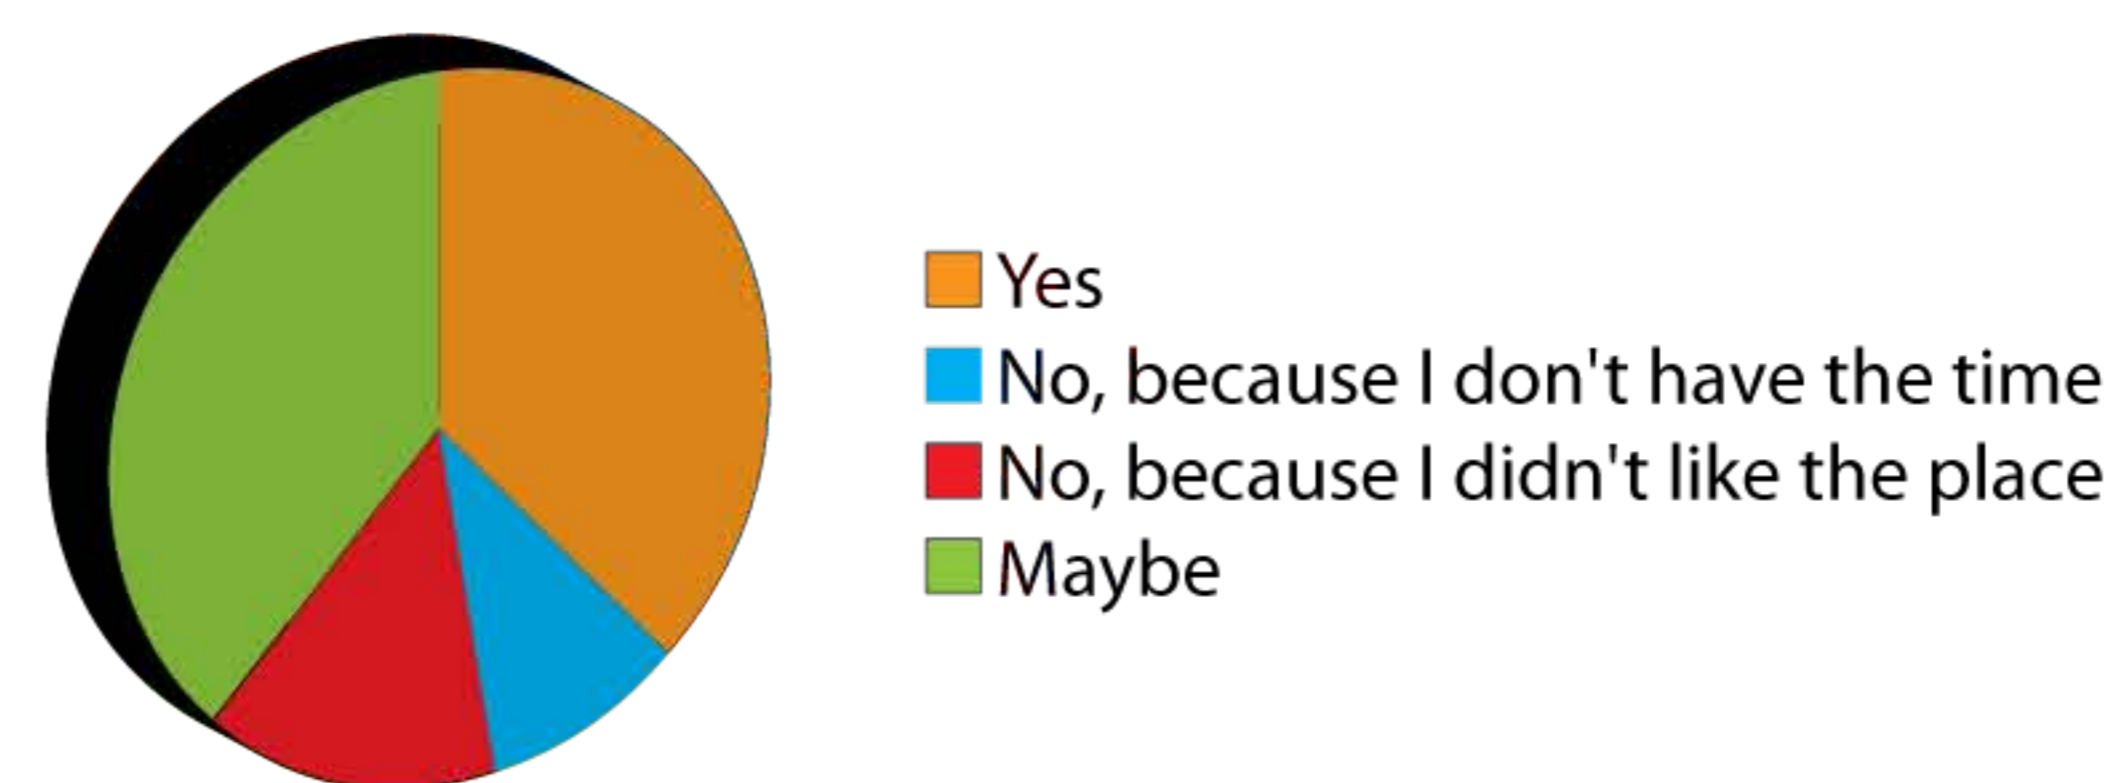

How did you obtain your internship?

How did your internship leave you, financially?

Given the opportunity, would you like to spend more time working at the same place (either as an intern or otherwise)?

Do you think your internship has taught you more about the world than all the courses you've done at IIT-B put together?
